

MOHAMMAD DZIKRI TAUFIK

LEAD TECHNICIAN | CONTINUOUS IMPROVEMENT ENTHUSIAST

Abu Dhabi, UAE | +971508984273 | mdzikritaufik@gmail.com | <https://linkedin.com/in/mohammaddzikritaufik/>

SUMMARY

Results-driven Continuous Improvement professional and hands-on experience in aircraft engine, specializing in CFM56 and LEAP-1A/1B engines under Part 145 regulations. Proven in leading and supporting cross-functional improvement initiatives to enhance safety, quality, and operational efficiency, with experience managing multiple projects and applying Lean Six Sigma methodologies. Possesses strong analytical and problem-solving skills to translate operational challenges into structured improvement actions, while leveraging hands-on technical expertise as an Engine Maintenance Technician and project coordination experience to deliver measurable impact on productivity, compliance, and turnaround time.

EXPERIENCE

Lead Technician LEAP-1A/1B - Operation

The Sanad Group (Mubadala Company), Abu Dhabi, UAE | October 2025 -Present

- Performed engine disassembly and assembly of LEAP-1A and LEAP-1B engines in accordance with Engine Shop Manual (ESM).
- Conducted incoming and removed parts, module & piece parts inspections, part segregation, and material disposition using ORACLE system.
- Prepared and reviewed technical documentation aligned with approved engine work scopes.
- Coordinated with Engineering, Supply Chain, and Special Process departments to ensure smooth workflow execution.
- Ensured compliance with safety and quality standards through FOD prevention, independent inspections, and Dirty Dozen awareness.
- Foster Continuous Improvement to LEAP-1B Engine Part Management in GATE 01.

Associate Product Manager

Zero One Group, South Jakarta, Indonesia | July 2024 - October 2024

- Engage with clients to understand their challenges by conducting thorough data analysis and maintaining open communication channels to identify core issues.
- Translate client issues into detailed technical work plans, ensuring that the engineering team has clear, actionable guidance to develop effective solutions.
- Oversee, manage, and monitor the tasks assigned to the engineering team, ensuring that deliverable align with project timelines and quality standards.
- Facilitate regular communication with stakeholders to ensure alignment, address concerns, and maintain project momentum, ensuring successful project execution and client satisfaction.

Continuous Improvement Coordinator - Production Support Officer

PT GMF AeroAsia (Subsidiary of Garuda Indonesia Group), Tangerang, Indonesia | August 2023 - July 2024

- Led cross-functional teams to implement continuous improvement initiatives in engine maintenance processes, focusing on safety, quality, and efficiency.
- Build synergistic relationships with employees to carry out continuous improvements and product development that have a positive impact on the company.
- Initiated five key projects to uphold and enhance engine safety, compliance, and output quality.
- Monitored and supported approximately 20 improvement projects annually within the Engine Services Department to ensure successful execution and alignment with departmental goals.

Senior Engine Maintenance Technician

PT GMF AeroAsia (Subsidiary of Garuda Indonesia Group), Tangerang, Indonesia | December 2017- August 2023

- Disassembled and assembled CFM56-3, CFM56-5B, and CFM56-7B engines according to Engine Shop Manual (ESM).
- Conducted dirty inspection, part segregation, and tooling preparation for module work.
- Involved and contributed to Consumable Material Management Project, improve material inventory control and traceability of documentation.
- Involved and contributed to common hardware management project, improve common hardware of CFM56 engine flow process, traceability, readiness to meet project timeline.

- Participated in productivity improvement projects, reducing waste and enhancing accuracy of shop floor activity.

Management Trainee

PT Indonesia Multi Color Printing, Surabaya - Sidoarjo - Cikande, Indonesia | January 2017 - December 2017

- Perform recondition of metal packaging machine as mechanical engineer.
- Supervise tin coating and varnish within production line.
- Lead warehouse management project for the new plant.
- Foster the improvement of coating and varnish cleaning method.

EDUCATION

Universitas Mercu Buana (Mercu Buana University) (2019 - 2021)

Bachelor's Degree of Mechanical Engineering - GPA 3.50 of 4.00.

Politeknik Negeri Bandung (Bandung State Polytechnic) (2013 - 2016)

Associate Degree of Aeronautics - GPA 3.51 of 4.00.

CERTIFICATION

- **HUMAN FACTOR INITIAL** | SANAD | 2026
- **LEAP-1A ENGINE SYSTEM** | SANAD | 2026
- **DOCUMENTATION** | SANAD | 2025
- **FOD PREVENTION** | SANAD | 2025
- **SAFETY MANAGEMENT SYSTEM** | SANAD | 2025
- **BASIC ENGINEERING** | PT GMF AeroAsia | 2024
- **LEAN SIX SIGMA - GREEN BELT** | PT GMF AeroAsia | 2024
- **FAR PART 145** | PT GMF AeroAsia | 2023
- **CASR PART 145** | PT GMF AeroAsia | 2023
- **EASA PART M FOR FOREIGN EASA 145** | PT GMF AeroAsia | 2023
- **BASIC PROJECT MANAGEMENT** | PT GMF AeroAsia | 2023
- **SWIFT COMPLEX MAINTENANCE - PRODUCTION CONTROL** | PT GMF AeroAsia | 2023
- **PDCA CONCEPT** | PT GMF AeroAsia | 2022
- **BASIC SUPERVISORY TRAINING** | PT GMF AeroAsia | 2021
- **HUMAN FACTOR CONTINUATION TRAINING** | PT GMF AeroAsia | 2021
- **SWIFT COMPLEX MAINTENANCE - PRODUCTION** | PT GMF AeroAsia | 2021
- **BASIC INSPECTION FOR SHOP** | PT GMF AeroAsia | 2020
- **ENGINE CFM56 SERIES MAINTENANCE** | PT GMF AeroAsia | 2020
- **DANGEROUS GOODS AWARENESS CONTINUATION TRAINING** | PT GMF AeroAsia | 2020
- **ELECTRICAL WIRING INTERCONNECTION SYSTEM** | PT GMF AeroAsia | 2020
- **FUEL TANK SAFETY** | PT GMF AeroAsia | 2020
- **CFM56-7 SERIES BASIC ENGINE** | PT GMF AeroAsia | 2020
- **SAFETY MANAGEMENT SYSTEM** | PT GMF AeroAsia | 2020
- **GMF QUALITY SYSTEM** | PT GMF AeroAsia | 2020
- **BASIC ENGINE MAINTENANCE** | PT GMF AeroAsia | 2019

PROJECT PORTFOLIO - CONTINUOUS IMPROVEMENT & CAPABILITY ENHANCEMENT

- **SIGMAS: Stripping, Inspection, Gate Material Advanced System** - 2026. Web-based digitalization platform for Material Management in Aircraft Engine MRO, replacing manual paper-based processes. Serves ~40 technicians across engine stripping, inspection, and Material GATE 01 stages with barcode-based automated part identification, guided inspection workflows, standardized disposition recording, and real-time analytics dashboard.

Impact: (Target) Eliminated manual process errors; improved material traceability and part identification

accuracy by ~90%; enhanced real-time visibility for shop floor scheduling and resource allocation.

please visit staging environment web: <https://sigmas-git-master-dzikri-squarepants-projects.vercel.app/login>
– **preview user ID:12345 password: 12345678**

- **COHAS BOARD: Common Hardware Schematic Board For LPT Major Module CFM56-7 Series - 2024.** Translated complex Engine Shop Manual installation procedures into visual schematic format with understandable symbols and step-by-step guidance for technicians.

Impact: 90% of mechanics reported improved ease of use; reduced installation errors and rework; shortened installation learning curve for new technicians; improved first-pass quality.

- **Engine Consumable Material Management System - 2021 – 2023.** Designed comprehensive database and tracking dashboard and inventory control room for chemical and consumable material traceability during engine maintenance operations.

Impact: Eliminated inventory control gaps; improved material visibility for production planners; established single source of truth for compliance documentation and material usage patterns.

- **Common Hardware Management System Project (2020 - 2021).** Created dedicated kit management and storage system for common hardware parts removed during disassembly, with return-to-engine tracking.

Impact: Eliminated hardware loss and misplacement; improved parts availability for assembly phases; enhanced inventory accuracy and storage efficiency.

- **alliCator: Engine Assembly And Installation Calculator - 2019-2024.** Developed automated dimensional measurement calculation tool to replace manual calculations during engine assembly and installation phases.

Impact: Eliminated manual calculation errors and human error variability; reduced inspection time per engine; created permanent database of measurement records for R&D and continuous improvement analysis.

COMPETENCIES

- Leadership & Project Management: Project Planning & Execution (scope, timeline) • Cross-functional Team Coordination & Stakeholder Management • Process Improvement Methodology (DMAIC, Lean, Six Sigma, agile, SCRUM) • Data Analysis & Decision Making • Risk Assessment & Mitigation • Training Delivery & Capability Development
- Technical & Operational: Aircraft Engine Maintenance (CFM56 Series, LEAP-1A/1B) • Facility Optimization & Safety Management • Procedure Development & Documentation • Equipment Readiness Planning • Production Scheduling & Resource Allocation • Regulatory Compliance (Part 145, EASA, FAA)
- Software & Systems: Microsoft Office Suite (Excel, Power Point, Word, Teams) • Maintenance Systems (ESM, SAP, ORACLE, cMRO) • Data Visualization & Dashboard Design • Web Application Development (basic).

LANGUAGES

- Indonesian (Native).
- English (Conversational).
